On board a man-of-war the bugle and the bugleman's pipe are required in the exercise of signal duty. The bugle and the pipe are two separate musical instruments, and are the same in materials and construction, and are both in the key of B flat. The bugle is used chiefly for commands bearing on nautical or military subjects, and the bugleman's pipe is chiefly used for musical purposes.

The bugleman's pipe is used nearly the same as the bugle, except that it is shorter and is held in the mouth. The bugleman's pipe is used for signals and commands, and is used in all parts of the ship.

The bugle is used in the deck of the ship, and is held in the hand. The bugle is used for signals and commands, and is used in all parts of the ship.
